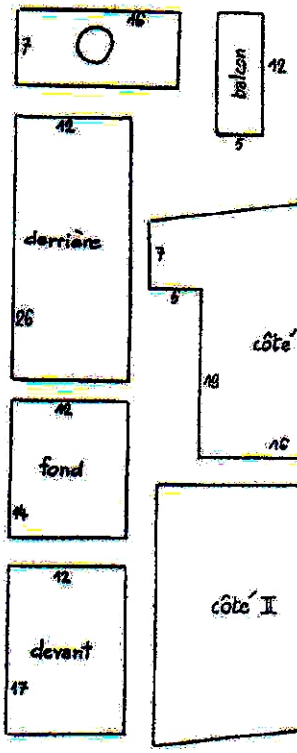
Bagnolet

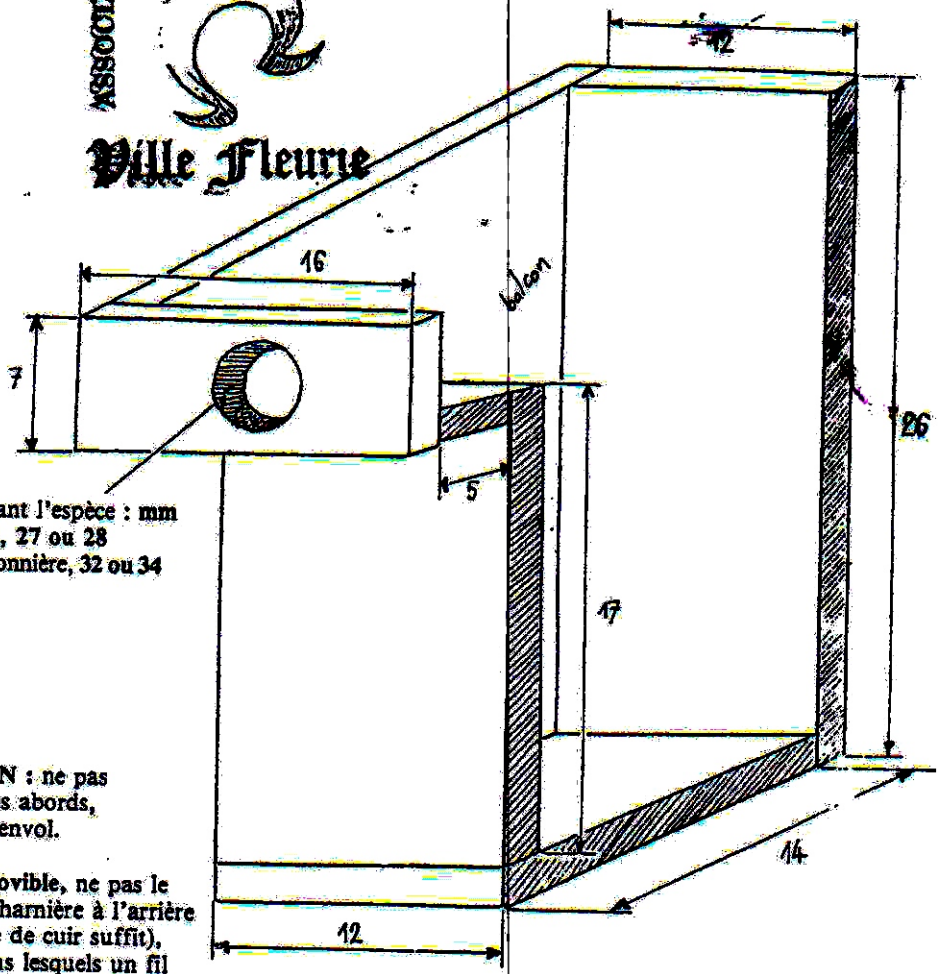
NICHOIR A BALCON

à mettre en place à 2 m du sol à proximité d'un arbre ou arbuste

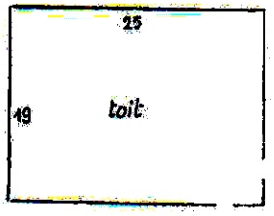
ASSOCIATION Ville Fleurie

Les cotes sont exprimées en centimètres, sauf pour le trou d'envol qui est en millimètres.





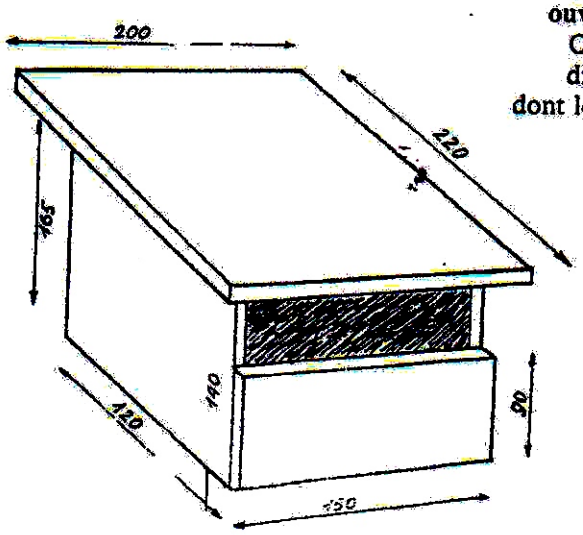
∅ du trou suivant l'espèce : mm
- mésange bleue, 27 ou 28
- mésange charbonnière, 32 ou 34
- sitelle, 34

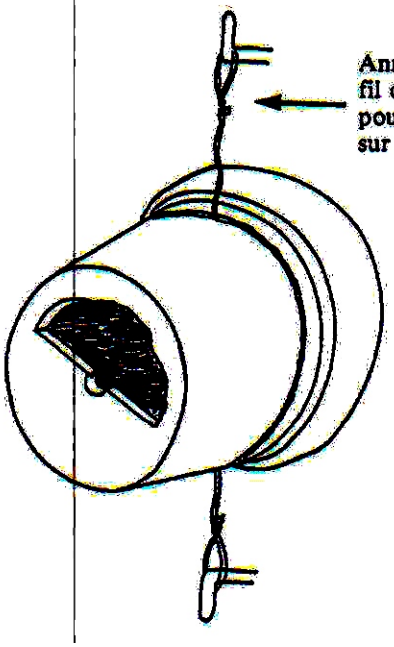


ATTENTION : ne pas peindre ni les abords, ni le trou d'envol.

Le toit doit être amovible, ne pas le clouer, mettre une charnière à l'arrière (un bout de ceinture de cuir suffit), 2 clous cavaliers dans lesquels un fil de fer servira d'attache à l'avant.

Certains oiseaux, tels que bergeronnettes, gobe-mouches, rouges-queues ou rouges-gorges, **exigent des nichoirs ouverts,** du modèle ci-dessus. On peut aussi mettre à leur disposition un pot de fleurs dont le fond a été à demi retiré.





Anneau de fil de fer pour fixation sur un mur.

Mangeoire : 1/2

matière : bois ép 2
